

ESDA-2

Egevent ESDA-2 serisi helisel üflemleri tavan difüzörleri 2,6 ila 4 metre arasındaki tavan yükseklikleri için ideal hava üfleme terminal üniteleridir. Helezonik devinimle üflenmiş hava çok kısa mesafeler içinde oda havasıyla homojen bir karışım sağlar.

ESDA-2 serisi helisel difüzörler iki tip kare plakalı ve bir tip dairesel plakalı olmak üzere üç ana tiptedirler. Her tip modelin efektif alanı değişiktir. Her slotta bulunan mistakilen ayarlanabilir damperler vasıtasıyla hava üfleme yönünü istediğiniz gibi yönlendirmek mümkündür.

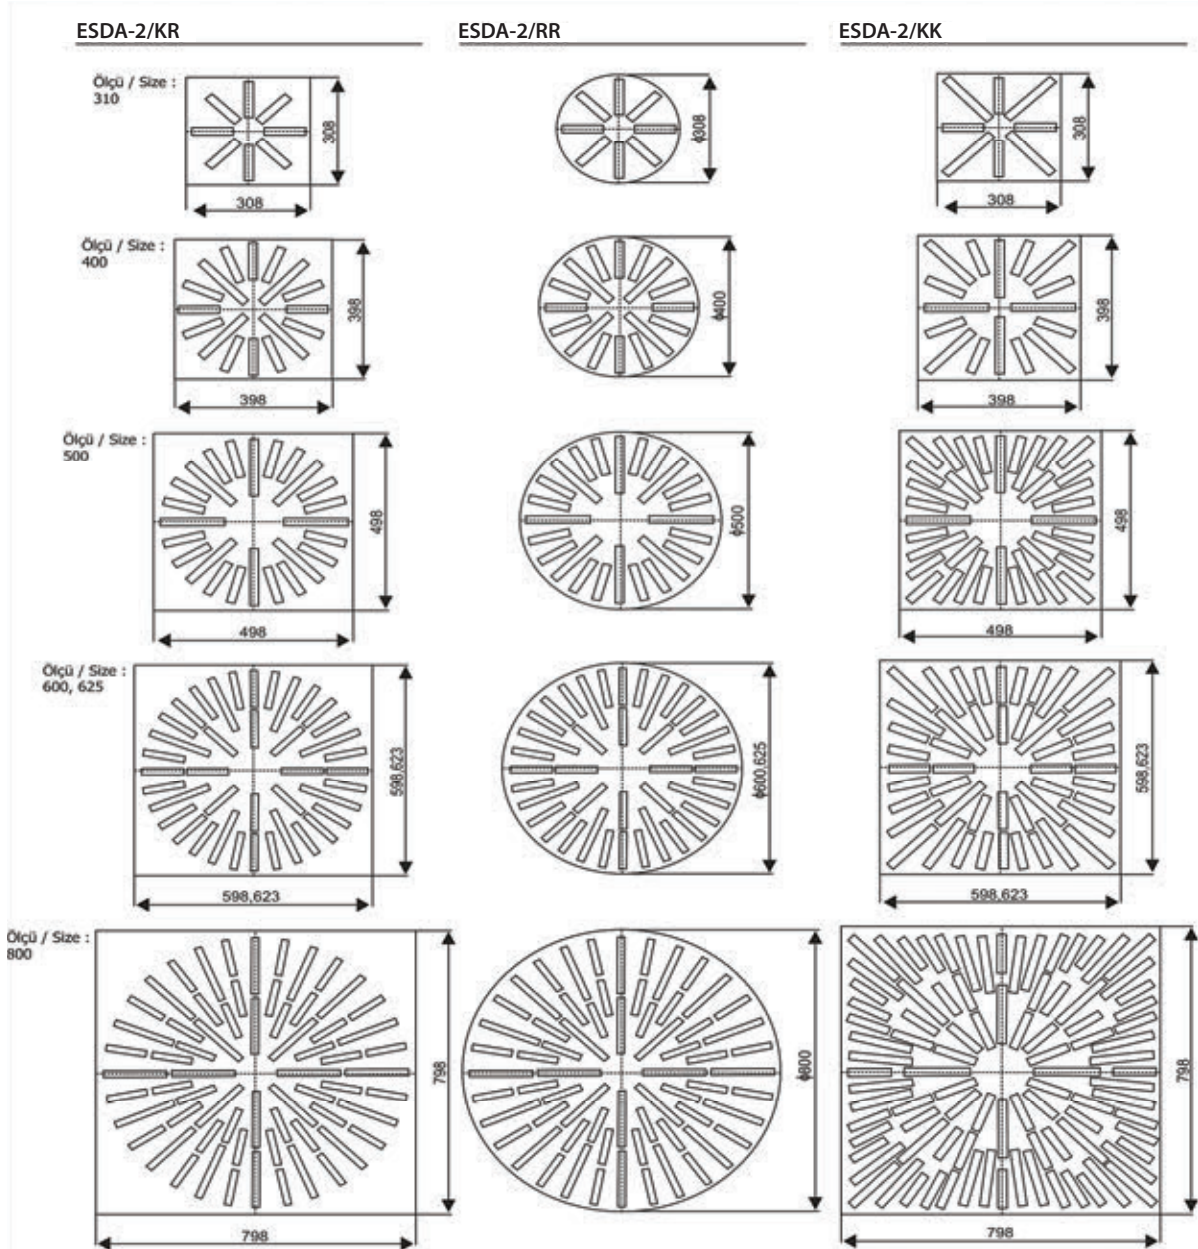

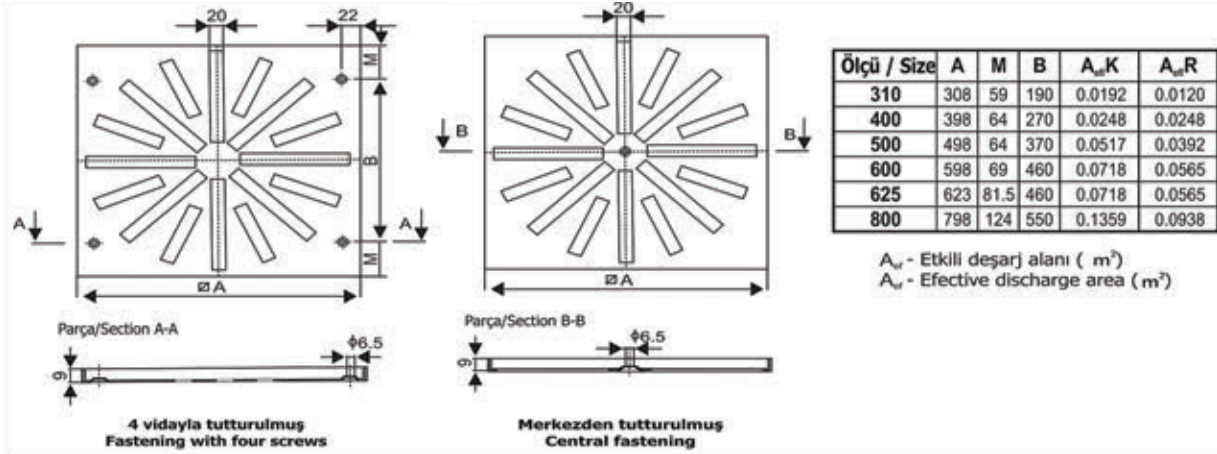

ESDA-2'leri plenum hücreli olarak ta sipariş etmek mümkündür.

Egevent ESDA-2 swirl diffusers are ideal supply units for premises with ceiling heights ranging from 2.6 meters to 4 meters. The air blown to the room follows a spiral "swirl" path which enables thorough mixing with the room air in very short distances.

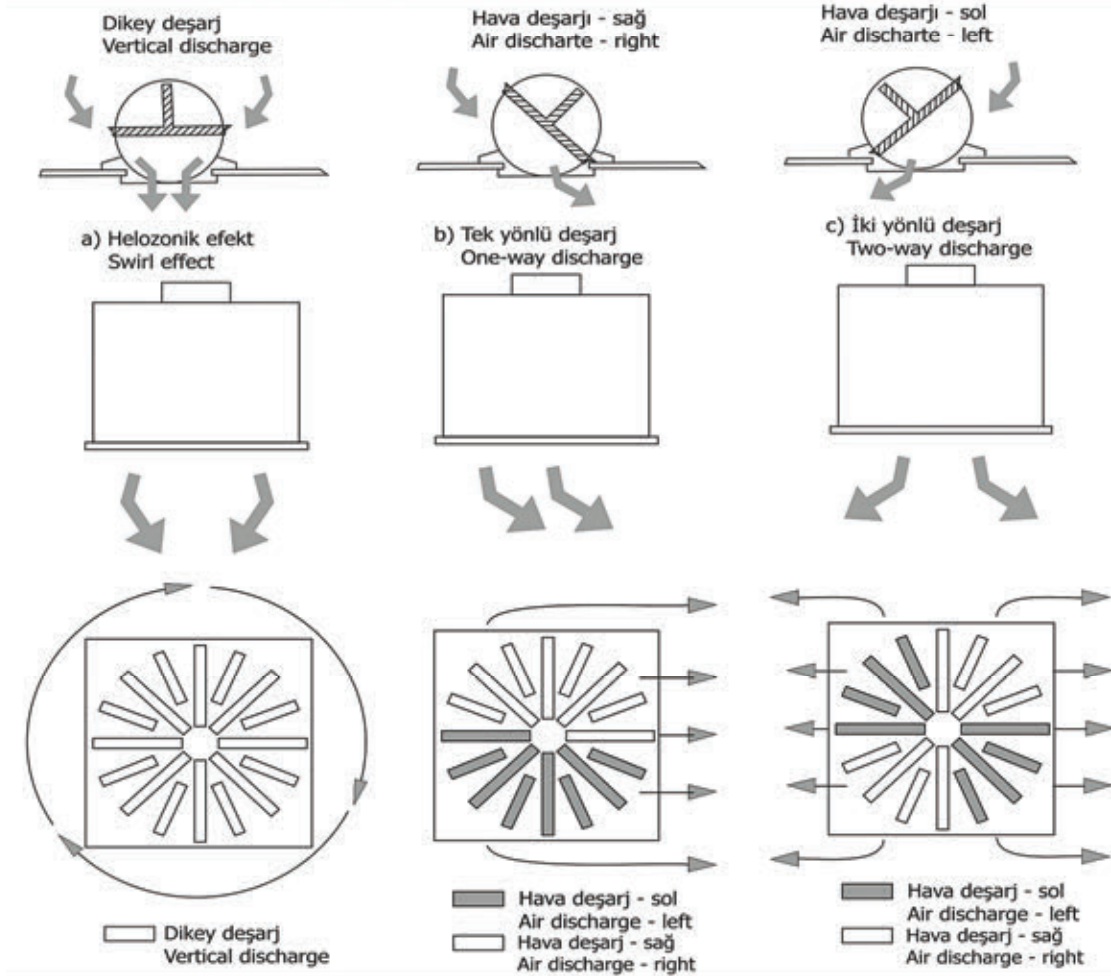

The ESDA-2 series swirl diffusers are composed of three major versions, two of which have square face plate and the third with circular face plate

They may be supplied plain or coupled with plenum boxes.
